

Ecological Economics for a seven-generation perspective

Presented by Eric Miller
h4x.ca

YOU Economic Innovation Forum
Nov 2, 2015 at York University

Conventional Economics

Informs Efficiency

Human Capital and Built Capital

Economic value = Market value

GDP growth = “Economic growth”

Promote the expansion of markets

Economists as elite advisors, offering predictions that direct decisions

Future values are highly discounted

Ecological Economics

Efficiency & Equity & Sustainability

Human and Built and Natural capital

= Market value + NonMarket value

GDP growth may or may not be economic

Solve market failures

Economists as facilitators, building simulation tools validated by stakeholders

Future values considered a bequest

Long Lives lived with High Satisfaction
and a minimal Ecological Footprint
